

CLASS 2000

Sportsman truck class – Leaf Sprung Rear Suspension This class is an open class, and all components will be considered open unless restricted herein Suspension Must have true leaf springs, spring under or spring over, no quarter elliptical systems allowed. Leaf springs must attach to one solid point on frame and one shackle. Front suspension is open, but suspension pivots must remain attached to factory frame rails. Doors and Latches Doors must remain functional and in original stock location with original hinges and working latch. Secondary positive latching devices mandatory if nets are attached to doors. Chassis and Body Factory Cab attached to factory frame rails. Factory frame rails must remain intact from rear suspension pivots to front suspension pivots. Frame rails can be cut, notched, sectioned, and reinforced. Suspension mounts can be relocated but must remain hung off factory frame rails.
